
UFSx Firmw.: UFS USB V2.8 (c) SarasSoft 2007.

UFSxBoot-UFSxBoot V2.2 (C) Sarassoft 2003 UFSx Firmw- UFS-USB V2.8 (C) Sarassoft 2007 UFSx S/N 77326 . Question about Cyclades TS100 (TES0061001). There is info on the network that it is also with GigaRAM. If so, then it turns out that it contains 2 two-gigabyte plates (512 MHz each). And if not, then how are they in terms of speed? And one more question: why is the Cyclades TS100 much slower than the TS100M? After all, they both work in single-processor systems on the same motherboard. As far as I understand, the same processor is used there. Question: How can this be explained? And one more thing: what is the difference between M1 and M2 in the Cyclade TS100? Or is it the same
