"If you like the sweet songs of Zelda II: The Adventure of Link and long for the world of high fantasy, Tarnished, the new Fantasy Action RPG released in the Japanese version of Nippon Ichi Software, might be the best game for you." "Tarnished doesn't use a classic class system and instead gives you the freedom to choose a wide variety of classes, making the gameplay easier to learn for beginners as well as easy to get into if you're a veteran of the series. There is no dialogue, so Tarnished is mostly a single-player experience, but it's fun even without any other people around." "I created a quest to reclaim my destroyed home, but even if you have no such worries, the game is hard." "In addition to the game's compelling story and characters, Tarnished also offers an extensive selection of battles where you can make use of the unique class system for the first time. The number of turns will vary with each battle, and you'll have to decide where to attack from when the enemy is hitting you on all sides." "Tarnished will likely satisfy the craving of old-school RPG fans as well as those who are just looking for a good action game." "In Tarnished, you play as a young elf who lives in a bff6bb2d33

What's new in Elden Ring:

Door to Dungeon (Door to Dungeon) Introduction

Door to Dungeon is a RPG that calls out to all players, marking the current point of conflict in society as “The door” for the “dungeon” of reality to open.

A Large World in the Front, You in the Back ()

Spend as much time as possible in the world, because the order is reversed in which the dungeon door opens.

The order reversal of “The door” means that encountering novelties in the dungeon opens the door to the future. A door that might not open in the future becomes a “potential way to go home” (ex: Liberated Slave girl).

A Primary Path for Clearness ()

In a traditional RPG, the player directly controls the actions of his party, so there is the feeling that “I could go no further” and it is a bit difficult to control the flow of the game.

The party dynamic can be conducted to the voice of the player, and the birth of a shared experience can be brought about.

And I can't add anything to the default drawable folder, as the Android system will not let me. If I change the name of the folder to something else, say \MyApp\drawable, it would use that. I have also tried putting the PreferenceActivity inside of its own folder like this:
