Defining and measuring empathy: a review of the research literature. The use of empathy as a concept in psychosocial work and developmental studies is reviewed from a bibliographic point of view. Following a historical review of the use of the concept of empathy and its conceptualization as a process-related, multidimensional construct, current research is reviewed and classified according to individual, relational, and situational dimensions. In a separate part, the conceptualization of empathy as the internalization of the other person's mental states is considered. Given the diversity of findings on empathy and related constructs, a consensus on a definition of empathy is not possible. An operational definition of empathy, however, is considered essential for a formalization of empathy as a research construct.

Q: How to work with a 3rd party library in Android I got a library and i want to use it. Ok, so what i did: Using dependencies in "build.gradle", i added the library.
