The game uses AI to evaluate the performance of 10,000 different parts of your body, to give your players the right reactions, their movements and decisions based on your team's performance. The youth you see in the trailer is not real, but he has the looks of ECA players. In this game you can see basketball like 3-point and 2-point shots, kick the ball over the bar and can score with headers. FIFA is supporting UEFA The new motion system will be used in this game and will be used by leagues like The English Premier League. The game will have a new set of stadiums and the gameplay has been improved. Whether launching an outrageous long shot, making an acrobatic save, or passing the ball to a teammate in space, FIFA delivers the explosive visuals and true-to-life emotions that make the real thing so special. What's new in FIFA 22? EASTHOF Inspired by its ultra-reality capture system for creating props and visuals, players can run around in their virtual shirt and experience the elements they face on the pitch. Experience what it’s like to run through a hailstorm, enjoy the wind in your face while sprinting with the ball and learn why headers win headers. PLAYER CONTROL MAKE THE CUT AND CONTROL THE GAME Work on the fly, intelligently. Player movement has been improved in FIFA 22 to ensure that all players move and behave like true, football-playing athletes on the pitch. And work your way through the game seamlessly from offense to defense, based on unique tactical AI systems. Make the right play under pressure, no matter where you are on the pitch. Simulations and training drills have been expanded so players can identify and exploit spaces and take advantage of situations. Control skill set and position advantage like never before in FIFA. Improved dribbling and acceleration, improved set piece play, and new in-game leadership management let you control your play and the flow of the match. NEVER PLAY AGAIN - GO FAST, BEAM EASY Running sprints have been revolutionized.

FIFA 22 will automatically calibrate the player to a new, more dynamic pace, so runners can sprint as fast as they like with the game, without having to manually recalibrate and lose speed once the match starts. Responding to this change, players have a new ability to control where they get to the ball and how they control it. New dribbling animations will let you control the ball, while new “beam” speed and reactive physics let you accelerate when you need to. **PLAYERS BETTER THAN EVER** The best FIFA players know more than tactics and skills. Player personality is now driven by their real-life game IQ, which is now assigned to all players automatically. Whether running through defensive lines or just out of control with the ball, each player has a unique character and personality. bc9d6d6daa
